Journey

Established in the year 1968, Anabham Koteswara Rao & Sons, has carved out a niche for itself as a pioneer of hand loom endless woven belts or truly endless belts used for diverse industrial applications. Our wide range of products comprises of garniture tapes, suction tapes, paper sheet cutter belts, forging hammer lifting belts, nylon pull cord, kevlar belts & ropes, elevator belts, drier elevator belts, endless belts, perlon ropes, bucket elevator belts, industrial elevator belts, rice mill belt, bucket elevator belts, drier elevator belts etc. We have the distinction of being the only company manufacturing such belts in the world. Focusing on quality of our products we make tireless efforts to check the each and every product throughout the production process. We also keep a close watch on the raw materials that we source and use for manufacturing our products. It is ensured that the materials are procured from only trusted vendors who have a reputation of providing genuine materials.

Our Other Products

RICEMILL BUCKET ELEVATOR BELTS

Our company is engaged in manufacturing of nylon elevator belts/Rice Mill Bucket Elevator and Drier Elevator Belts that are made from 100% nylon and are coated with certain chemicals. This chemical coating ensures longer work life and also prevents wear and tear. Our nylon elevator belts have a life of 5 to 6 years and are extensively used for bucket elevators that are applicable in rice mills, doll mills, iron, agriculture etc. These belts are also widely used for dryer elevators and for transmission purposes in rice mills. Our range of Rice Mill Belts can be availed in the following

Features:

Width: 2" to 40".

Length: 10' to 300' (50 mtrs. or 100 mtrs rolls).

Thickness: 4 mm to 25 mm

FORGING HAMMER LIFTING BELTS

Our company is one of the leading manufacturers of nylon hammer lifting belts that are extensively used in the forging industry for lifting the forging hammer/Forging Hammer Lifting Nylon Belts. We supply our belts in two popular colors like:

Yellow: It is made from 100% nylon (six ply weaving). These chemical coated belts are strong and have more work life than cotton/nylon lifting belts.

White: It is made from 100% nylon (six ply weaving). These are synthetic coated belts.

The wide range of our nylon hammer belts is available in a variety of features like:

Width: 3" to 20"

Thickness: 8 mm to 20 mm thick.

Length: As per client's requirement.

NYLON PULL CORD

We manufacture a variety of nylon pull cords/Nylon Cords (Hammer Lifting Rope, Pull Cord) made from 100% nylon. These are also known as lifting or hammer ropes. The range of our inter-locking ropes is manufactured and available in three diameters:

10 MM OR 3/8" Dia X 50 mtrs rolls

12 mm or 1/2" dia x 50 mtrs rolls

15 mm or 5/8" dia x 50 mtrs rolls

PAPER SHEET CUTTER BELTS

We are a renowned manufacturer of paper sheet cutter belts that are popularly applicable in the paper industry for primary and secondary cutters. The joining of these belts comes in the weaving itself. It does not loosen like other jointed belts. The range of our paper sheet cutter belts is manufactured and available in the following two types:

- Special Egyptian cotton sheet cutter belts. This range is made from imported cotton and its elongation percentage is low. These belts are supplied in matched sets. We have been supplying our belts to numerous paper mills for the last 40 years.

- Indian cotton sheet cutter belts: We started production of these cotton belts five years ago keeping the cost factor in mind. This range is also supplied in matched sets.

The range of our paper sheet cutter belts is available in the following specifications:

- Width: 1" to 15"
- Length: 30" to 300" in endless and 50 mtrs rolls.
- Thickness: 2 mm to 6 mm.

KEVLAR BELTS & ROPES

These are special purpose belts & ropes working upto 250° C centigrade. Mainly for heaters, heater elements, highspeed grinding m/c. Etc. Our range of kevlar belts & ropes are available in the following features.

Belts width : 6 mm to 20"

" Length : 5 mtrs To 100 mtrs Rolls

" Thickness : 1mm to 15 mm

" Endless : 40" to 10 mtrs

Rope dia : 3 mm dia to 15 mm dia. Rolls

" Length : 5 mtrs. To 100 mtrs. Rolls

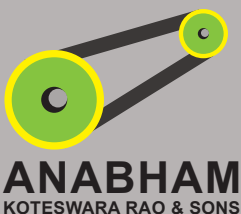

" Endless : 40" to 10 mtrs

BRAKE LINING FOR FORGING HAMMERS

SUPER INDUSTRIAL BRAKE LINING (B A QUALITY)

Our brake lining is woven on the most ultra modern mechanised Loom, Black in colour, is impregnated woven asbestos yam, reinforced with the best available fine quality of brass wire which imparts it with the added strength and assists in heat dissipation. Our Brake lining is approved and tested by the Automotive Research Association, Pune as per ISI:2742 amendment part and each consignment is tested in our laboratory prior to despatch.
